

Exemplify Updates

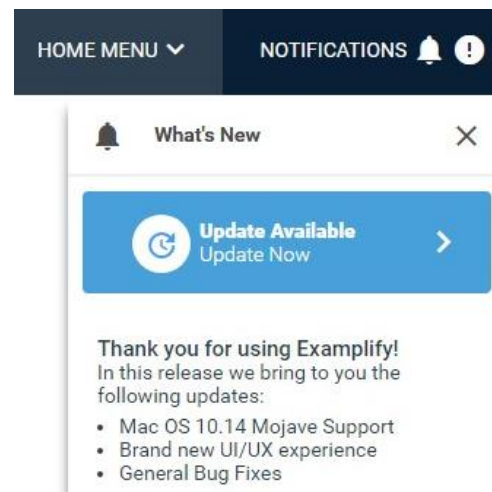

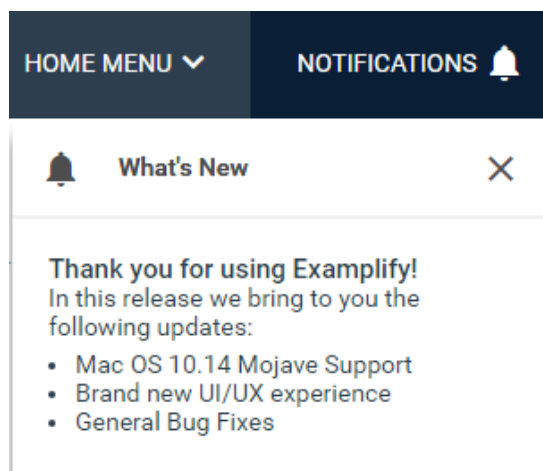

For midterms and finals, it is important that you are on the latest version of Exemplify. It is essential to stay up to date with Exemplify as doing so will dramatically reduce your risk of tech problems.

When Exemplify has an optional update, you should receive a popup like the photo to the left within Exemplify.

We always recommend that you click Update Now. We would also recommend checking for updates 24 hours or so before your exam, especially as some updates will require you to restart Exemplify and or your computer.

If you aren't sure if you are on the latest version of Exemplify then click on the Notifications button next to the Home Menu on the upper right-hand side. Notifications will let you know if you do have an update as well as let you know what was updated on the latest release:

To the left is what the Notifications tab looks like when there isn't an update. To the right is what it looks like when there is an update. There is an update button and Notifications has an Exclamation Point Icon. The Update Available button will appear when there is a new version of Exemplify.

If you have any questions or issues with installation, registration, or updates of Exemplify, contact Bao Campbell at bao@seattleu.edu and lawreg@seattleu.edu.
